

What do I do if I smell gas or the CO alarm sounds?

! If you smell gas or the CO alarm sounds, contact the National Gas Emergency Helpline on 0800 111 999 – do not use a telephone in the property as it can cause sparks.

Then take these safety tips:

- Turn off the gas supply and all gas appliances.
- Open doors and windows to ventilate the property.
- Extinguish all naked flames, and do not use anything that can be a source of ignition such as lighters or matches etc.
- Do not smoke.
- Do not operate any electrical switches or appliances including electrical door entry systems.
- Open doors and windows to ventilate the property.

Call us at Ashfield District Council once the National Gas Engineer has visited to enable us to arrange any required work.
