

Appendix J: Appraisal of development management policies

Score	Description	Symbol
Significant Positive Effect	The option contributes significantly to the achievement of the objective.	++
Minor Positive Effect	The option contributes to the achievement of the objective but not significantly.	+
Neutral	The option does not have any effect on the achievement of the objective	0
Minor Negative Effect	The option detracts from the achievement of the objective but not significantly.	-
Significant Negative Effect	The option detracts significantly from the achievement of the objective.	--
No Relationship	There is no clear relationship between the option and the achievement of the objective or the relationship is negligible.	~
Uncertain	The option has an uncertain relationship to the objective or the relationship is dependent on the way in which the aspect is managed. In addition, insufficient information may be available to enable an appraisal to be made.	?

NB: where more than one symbol/colour is presented in a box it indicates that the appraisal has identified both positive and negative effects. Where a box is coloured but also contains a '?', this indicates uncertainty over whether the effect could be a minor or significant effect although a professional judgement is expressed in the colour used. A conclusion of uncertainty arises where there is insufficient evidence for expert judgement to conclude an effect.

Adapting to Climate Change

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
<p>1. Housing To ensure that the housing stock meets the housing needs of Ashfield.</p>	+	+	+	+	<p>Likely Significant Effects</p> <p>Policy CC1 supports the development of energy and water efficiency properties, which is considered to support aims to achieve good standards of housing within the district. Policy CC2 supports water efficiency measures in new residential development with the requirement for 110 litres per person per litre and ensures adequate infrastructure in place. These measures will support the provision of high-quality new housing development in the district. Policy CC3 would support development of housing in areas that avoid high flood risk thereby supporting development that would be safe over its lifetime.</p> <p>Overall, the policies are considered to have minor positive effects on the achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • That the introduction of water efficiency measures does not affect viability of development or lead to less affordable housing. <p>Uncertainties</p> <ul style="list-style-type: none"> • None.
<p>2. Health To improve health and wellbeing and reduce health inequalities.</p>	+	+	+	+	<p>Likely Significant Effects</p> <p>Policy CC1 would support energy efficient development and new renewable/low carbon development that could support the long-term health of the district's population and reduce noise and air pollution. CC2 would ensure that development does not negatively affect water quality thereby supporting health of the reducing the</p>

					<p>potential for pollution in waterbodies. Policy CC3 would ensure that all development is safe from flooding thereby supporting the wellbeing of the communities of Ashfield.</p> <p>Overall, the policies are considered to have minor positive effects on the achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • None. <p>Uncertainties</p> <ul style="list-style-type: none"> • None.
<p>3.Historic Environment To conserve and enhance Ashfield's historic environment, heritage assets and their settings.</p>	-/?	~	~	-/?	<p>Likely Significant Effects</p> <p>CC1 has the potential for negative effects on the historic environment related to the development of renewable energy/low carbon energy generation schemes. However, the policy does seek to avoid development that leads to significant adverse effects on other policy areas (which can be assumed to include those relating to the historic environment). It is considered that policies protecting water quality and seeking to avoid areas of highest flood risk do not have relationship with the achievement of this objective. Policies elsewhere in the plan would ensure that design of any infrastructure, or any other measures, to reduce the risk of flooding would take into account issues relating to the historic environment.</p> <p>Overall, the policies are assessed as having minor negative effects although there is some uncertainty over the presence, magnitude and extent.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None.

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
					<p>Assumptions</p> <ul style="list-style-type: none"> That other policies in the plan would ensure impacts on the historic environment are considered for renewable/low carbon energy infrastructure. <p>Uncertainties</p> <ul style="list-style-type: none"> The location of wastewater infrastructure and SUDs that may be provided is unknown at this stage. The location renewable/low carbon energy generation schemes.
<p>4.Community Safety To improve community safety, reduce crime and the fear of crime.</p>	0	~	~	0	<p>Likely Significant Effects CC1 is considered to have neutral effects on this objective. It is considered that policies protecting water quality and seeking development to avoid areas of highest flood risk would not impact upon community safety. Overall, the policies are assessed as having a neutral effect on this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> None. <p>Assumptions</p> <ul style="list-style-type: none"> None. <p>Uncertainties</p> <ul style="list-style-type: none"> None.
<p>5.Social Inclusion Deprivation To improve social inclusion and to close the gap between the most deprived</p>	+	+	~	+	<p>Likely Significant Effects CC1 would support the development of energy efficient housing that potentially lead to lower heating and lighting bills for occupants. The policy also supports development that reduces the need to travel, which may increase the accessibility of services, facilities and employment. CC2 seeks the incorporation of the water efficiency measures in new residential development that exceed no more than 110 litres per</p>

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
areas and the rest of Ashfield.					<p>person per day. The implementation of energy and water efficiency measures can support reduced bills which can help the most deprived in the district.</p> <p>Overall, the policies in this section would have a minor positive effect on the achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • That the introduction of water efficiency measures does not affect viability of development or lead to less affordable housing. <p>Uncertainties</p> <ul style="list-style-type: none"> • None.
<p>6. Biodiversity & Green Infrastructure</p> <p>To conserve, enhance and increase biodiversity levels and Green & Blue Infrastructure</p>	+/-/?	++	+	++/-/?	<p>Likely Significant Effects</p> <p>CC1 requires the incorporation of green and blue infrastructure, trees and other planting which could support achievement of the objective. However, the policy also supports the development of renewable/low carbon schemes. The policy seeks to avoid significant adverse effects on other policy areas (which includes designated nature conservation/biodiversity assets and protected species) but there may still be localised effects on biodiversity. However, their presence and the magnitude is dependent on the location of development.</p> <p>CC2 supports the achievement of the Humber River Basin Management Plans and Water Framework Directive in protecting and improving the quality of water bodies and ecological systems. It also specifically seeks that there are no adverse effects on water related environmentally significant sites. CC3 supports the development where it enhances biodiversity interest.</p>

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
					<p>Overall, the policies are considered to have a mix of significant positive and minor negative effects on the achievement of this objective although some uncertainty remains.</p> <p>Mitigation</p> <ul style="list-style-type: none"> None. <p>Assumptions</p> <ul style="list-style-type: none"> That other policies in the plan would ensure impacts on biodiversity and habitats are considered for renewable/low carbon energy infrastructure. <p>Uncertainties</p> <ul style="list-style-type: none"> None.
<p>7.Landscape To protect enhance and manage the character and appearance of Ashfield's landscape /townscape, maintaining and strengthening local distinctiveness and sense of place.</p>	-/?	0	0/?	-/?	<p>Likely Significant Effects</p> <p>CC1 seeks to ensure that development of renewable/low carbon technology schemes where there are no significant adverse effects on other policy areas (which can be assumed to include landscape and townscape). However, there may be negative effects on the landscape from such development dependent on location and design.</p> <p>CC2 and CC3 are considered to have neutral effects on the achievement of this objective. CC2 requires appropriate wastewater treatment capacity to be in place. The development of such infrastructure may have landscape impacts. CC3 requires the provision of SuDs, which can have an impact on the landscape, but seeks to avoid hard engineering which are more likely to have impacts on landscapes/townscapes. Overall, the policies are considered to have neutral effects on the achievement of the objective. There is some uncertainty for CC3.</p>

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
					<p>Overall, the policies are considered to have the potential for minor negative effects on the achievement of this objective although some uncertainty remains.</p> <p>Mitigation</p> <ul style="list-style-type: none"> None. <p>Assumptions</p> <ul style="list-style-type: none"> That other policies in the plan (EV10 in particular) would ensure impacts on the landscape are considered. <p>Uncertainties</p> <ul style="list-style-type: none"> The location of wastewater infrastructure and SUDs that may be provided is unknown at this stage. The location of renewable/low carbon technology schemes.
<p>8.Natural Resources To minimise the loss of natural resources including soils, greenfield land and the best quality agricultural land.</p>	+/-/?	+	+	+/-/?	<p>Likely significant effects</p> <p>CC1 may see the use of greenfield land or brownfield land for renewable energy/low carbon schemes. Many schemes (such as solar energy farms) are likely to be temporary but would still be expected to have an effect on natural resources. The policy specifically seeks energy storage proposals on previously developed and/or industrial sites. CC2 and CC3 both seek to CC2 would ensure that adequate wastewater treatment capacity is in place and indirectly ensure that soils are also protected from contaminants.</p> <p>Overall, the policies in this section would have a minor positive effect on the achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> The policy could particularly support the use of brownfield sites for renewable energy schemes. <p>Assumptions</p>

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
					<ul style="list-style-type: none"> None. Uncertainties <ul style="list-style-type: none"> None.
9. Air & noise pollution To reduce air pollution and the proportion of the local population subject to noise pollution.	+	~	~	+	Likely significant effects CC1 is considered likely to support the reduction in pollution derived from the use of fossil fuels. The policies concerned with water quality and flood risk (CC2, CC3) are not considered to have a direct relationship with this objective.
10. Water Quality To conserve and improve water quality and quantity.	+	++	++	++	Likely significant effects The Watercycle Study for Greater Nottingham and Ashfield (2010) indicated water resources in the East Midlands are significantly constrained with little opportunity to develop new water resource schemes. The shortfall identified in the Watercycle Study (of water supply) is also identified in the more recent Severn Trent Water Resources Management Plan (WRMP, 2019) within the Nottinghamshire Water Resource Zone but the WRMP19 proposes a range of demand and supply measures to ensure sufficient water resources can be maintained up to 2025 (and in outline up to 2030). The Watercycle Study for Greater Nottingham and Ashfield (2010) notes that there are no capacity constraints at Ashfield's Wastewater Treatment Works.

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
					<p>Ashfield sits on principal and secondary aquifers so the need to protect groundwaters is particularly important, but it is not considered that development through these policies would have an effect, subject to effective measures being put in place during the development process.</p> <p>CC2 is the primary policy in the plan for ensuring that water quality in groundwaters and surface waters does not deteriorate. The policy specifically requires development to have regard to the Humber River Basin Management Plan and Water Framework Directive in protecting the quality of water bodies.</p> <p>CC3 supports the provision of SuDs and seeks to avoid areas of highest flood risk which contributes to sustainable water management. The implementation of effective SuDS can also help protect water quality.</p> <p>The policies in this section are considered to have significant positive effects on achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • None. <p>Uncertainties</p> <ul style="list-style-type: none"> • None.
<p>11.Waste To minimise waste and increase the re-</p>	+	+	~	+	<p>Likely significant effects</p> <p>Policy CC1 states that development should minimise the generation of waste and promote sustainable approaches to waste management, including recycling and reuse construction waste. This is likely to support positive outcomes. Policy CC2 supports water</p>

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
use and recycling of waste materials.					<p>efficiency in new buildings which supports overall objective to reduce waste and recycle materials. Overall, the policies in this section would have minor positive effects on the achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • None. <p>Uncertainties</p> <ul style="list-style-type: none"> • None.
<p>12. Climate Change and Flood Risk</p> <p>To adapt to climate change by reducing and manage the risk of flooding and the resulting detriment to people, property and the environment.</p>	0	+	++	++	<p>Likely significant effects</p> <p>The Strategic Flood Risk Assessment (SFRA) (2009) identifies that the district has a relatively low risk of flooding from watercourses. Flood risk is mainly away from the urban areas. However, it is recognised that additional water in the River Leen could cause flood issues for Nottingham to the south. Policy CC3 is the primary policy to ensure that development is located in areas of the district with the lowest risk of flooding. The policy would ensure that new development has taken the impact of flood risk into account.</p> <p>Overall, the policies in this section are considered to have a significant positive effect on the achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • It is assumed that new renewable/low carbon energy schemes will be subject to site specific Flood Risk Assessment (FRA).

					<p>Uncertainties</p> <ul style="list-style-type: none"> None.
<p>13.Climate Change and Energy Efficiency</p> <p>To adapt to climate change by minimise energy usage and to develop Ashfield’s renewable energy resource, reducing dependency on non-renewable sources.</p>	++	+	~	++	<p>Likely significant effects</p> <p>Policy CC1 requires all development proposals to mitigate climate change and contribute towards targets to reduce greenhouse gas emissions. The policy seeks the incorporation of (inter alia) opportunities for natural heating and ventilation, measures to support cooling and shading, water efficiency measures, energy efficiency and decentralised renewable/low carbon technologies, and vehicle charging facilities in new development. Additionally, the policy supports the development of standalone renewable energy/low carbon technology schemes. This is considered to significantly support the objective.</p> <p>Policy CC2 seeks achievement of no more than 110 litres per person per day in residential development and that business/commercial development should be water efficient. This would support more efficient buildings.</p> <p>Overall, the policies in this section are considered to have a significant positive effect on this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> None. <p>Assumptions</p> <ul style="list-style-type: none"> None. <p>Uncertainties</p> <ul style="list-style-type: none"> None.

SA Objective	Policies				Commentary
	CC1	CC2	CC3	Cumulative	
<p>14.Travel and Accessibility To improve travel choice and accessibility, reduce the need for travel by car and shorten the length and duration of journeys.</p>	+	~	~	+	<p>Likely significant effects Policy CC1 states that (inter alia) development should enable occupants to minimise their need to travel and maximise opportunities for sustainable modes of travel.</p> <p>The remaining policies would ensure water quality is maintained and areas of highest flood risk avoided. There is no clear relationship and supporting increased travel choice and sustainable modes of transport.</p> <p>Overall, the policies are assessed as having minor positive effects on this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • None. <p>Uncertainties</p> <ul style="list-style-type: none"> • None.
<p>15.Employment To create high quality employment opportunities including opportunities for increased learn and skills to meet the needs of the District.</p>	0	~	+	+	<p>Likely significant effects Policy CC3 would ensure that new employment development would not be located in areas of highest flood risk although employment uses are recognised in national policy as being less vulnerable to flood risk. Overall, the policies in this section would have minor positive effects on the achievement of this objective.</p> <p>Mitigation</p> <ul style="list-style-type: none"> • None. <p>Assumptions</p> <ul style="list-style-type: none"> • None. <p>Uncertainties</p>

							Uncertainties <ul style="list-style-type: none"> The precise location of development.
10. Water Quality To conserve and improve water quality and quantity.	-/?	-/?	-/?	-/?	-/?	-/?	Likely significant effects The Watercycle Study for Greater Nottingham and Ashfield (2010) indicated water resources in the East Midlands are significantly constrained with little opportunity to develop new water resource schemes. The shortfall identified in the Watercycle Study (of water supply) is also identified in the more recent Severn Trent Water Resources Management Plan (WRMP, 2019) within the Nottinghamshire Water Resource Zone but the WRMP19 proposes a range of demand and supply measures to ensure sufficient water resources can be maintained up to 2025 (and in outline up to 2030). The Watercycle Study for Greater Nottingham and Ashfield (2010) notes that there are no capacity constraints at Ashfield's Wastewater Treatment Works. Ashfield sits on principal and secondary aquifers so the need to protect groundwaters is particularly important, but it is not considered that development through these policies would have an effect, subject to effective measures being put in place during the development process. Overall, the policies in this section would have minor negative effects on the achievement of this objective, reflecting that development through these policies would increase water use and increase pressure on water resources but that WRMP's would help to mitigate. However, there is some uncertainty dependent on how measures could be implemented to increase water efficiency.

5.Social Inclusion Deprivation To improve social inclusion and to close the gap between the most deprived areas and the rest of Ashfield.	+	0	+	0	++	?	++	0	0	0	0	0	0	++	++	Likely Significant Effects Ashfield, ranked at 68th out of 326 local authority areas, performs poorly in the Indices of Multiple Deprivation (IMD 2019). There are pockets of deprivation within the District. Policies SD5, SD7 and SD13 would have a significant positive effect on this objective. New infrastructure provision and developer contributions would help to provide new facilities and services and in turn help to improve social inclusion. SD7 supports new communications infrastructure and improvements to broadband whilst SD13 supports provision and protection of health of health facilities, both of which would in turn help to improve social inclusion and reduce deprivation. Policy SD3 would have a minor positive effect on this objective as it seeks to safeguard amenity. SD1 would also support community resilience and ensure social value is achieved in major developments.
